TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES

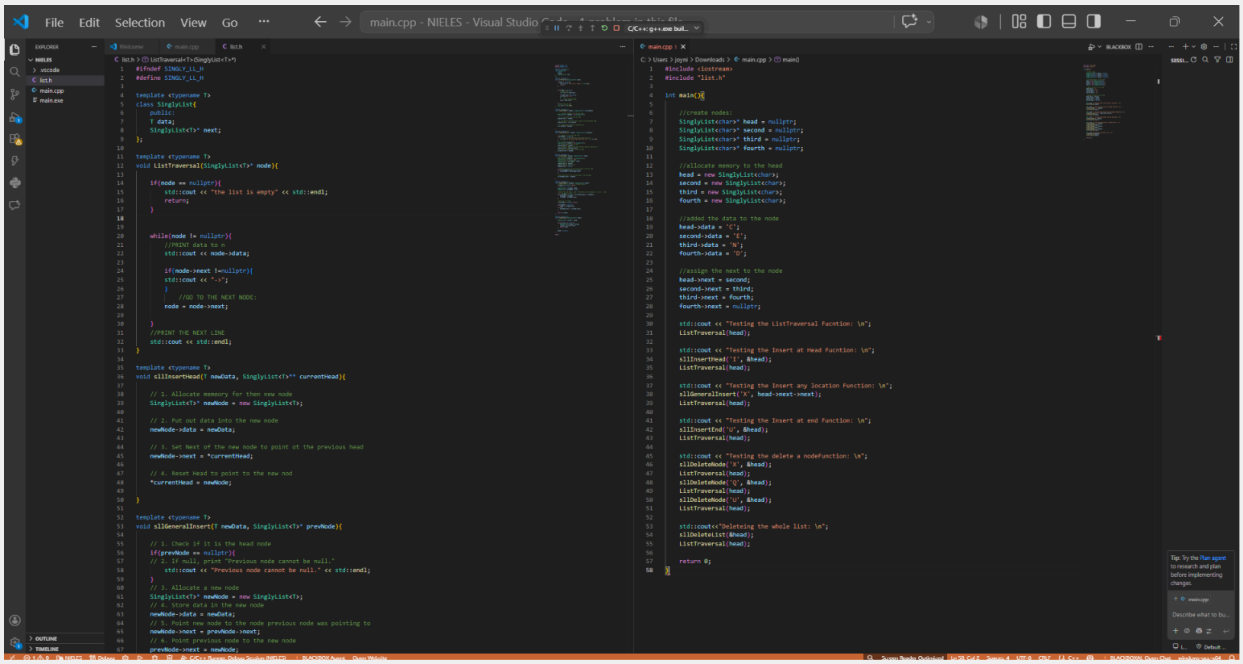

COMPUTER ENGINEERING

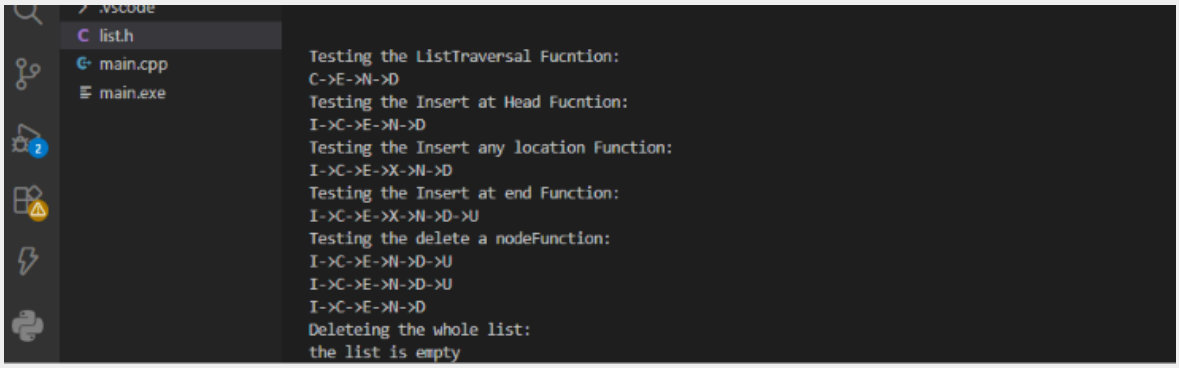

QUEZON CITY

COURSE CODE/TITLE:	CPE 010 Data Structure and Algorithm	**SECTION: CPE21S2**	
DATE PERFORMED:	07/22/26	**DATE SUBMITTED:**	07/22/26
NAME:	Nieles, Cenndy M	**INSTRUCTOR:**	Engr. Jimlord Quejado

ACTIVITY NO. __3.1_ [Seatwork 3.1: Creating a Singly Linked List]

1. PROCEDURE OUTPUT

Reflection:

The task involved creating nodes, inserting data at different positions, traversing the list, and deleting nodes also I create the singlyList class template that contains the data and a pointer to the next node, I create a node which is the head, second, third, fourth and allocate memory for each node and added a #include <iostream> and #include "list.h" to access input/output functions and linked list definitions and create a (template < typename T > so it can store different data types then use a new operator to create nodes during a program execution Tested function to verify that it worked correctly. Then I assigned the value of each node C, E, N, D and linked it together by setting a next pointer. I tested the ListTraversal() function to display all the elements in the linked list. Next I input and tested the sllInsertHead() to insert a new node in the beginning of list next I used sllGneralInsert() function to insert a new node after specified and insert node in the list then I implemented and tested llDeleteList() function to delete the entire linked list and free all allocated memory. Because of these challenges, I had to repeat them several times before I was able to make the program run correctly. I through it just easy but actually not because before you complete the task you need to understand first all the situation of the code I was frustrating while doing but I still continue until I get the correct program

What procedures did you perform?

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: **Google**

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: **For translator in my language to english**

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use:

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
